

► **VAPOR DISTRIBUTION LINE**

Hinsilblon's **Vapor Distribution Line** is utilized to treat fugitive nuisance odors as they cross the perimeter wall of open holding and process tanks.

The Vapor Distribution Line is constructed from polypropylene pipe, or flexible hose mounted on the tank wall.

► **HOW THE SYSTEM WORKS**

Hinsilblon's Patented Waterless Vapor Odor Control Unit will convert a pure and natural blend of essential plant oils from a liquid to an Odor Neutralizing Waterless Vapor.

This odor neutralizing vapor will be delivered into the malodorous air as it crosses the exterior wall of the open tank.

As the Odor Neutralizing Waterless Vapor and the fugitive Odors contact one another, the odor is neutralized.
