

Enclosed Cabinet HLDA Series

WATERLESS VAPOR ODOR CONTROL UNIT

Hinsilblon's Patented Waterless Vapor Odor Control Unit is designed to treat fugitive nuisance odor emissions.

This Odor Control Unit converts a blend of natural, bio-degradable essential plant oils from a liquid to an Odor Neutralizing Waterless Vapor.

Hinsilblon's Patented Waterless Vapor Odor Control Unit has been designed to operate in the harshest of environments.

All of the components are wash-down duty and corrosion resistant for consistent, reliable operation.

The entire system requires very little maintenance, involving only the periodic replacement of an air filter cartridge.

The Cabinet Unit

► TYPICAL APPLICATIONS

Hinsilblon's Enclosed Cabinet Odor Control Units are a solution to a wide variety of odor sources, including interior and exterior applications.

The system does not utilize any water, making it the ideal treatment method for remote applications that do not have a clean water source nearby.

The liquid odor neutralizer is 100% pure, without any water or surfactants; it will not freeze, whether in storage, in the odor control unit, or as an odor neutralizing waterless vapor when delivered into the ambient air.

Hinsilblon's Patented Waterless Vapor Odor Control Unit can operate year round, 24 hours a day, 7 days a week.

WATERLESS VAPOR ODOR CONTROL UNIT

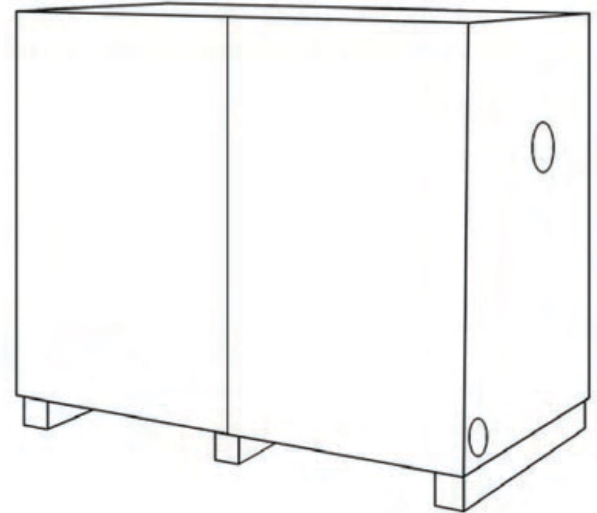

► UNIT SPECIFICATIONS

Cabinet - DIAMOND PLATE ALUMINUM

HLDA 1000/1500 Dimensions: 78"w x 52"h x 39"d

HLDA 500/750 Dimensions: 68"w x 52"h x 39"d

HLDA 75/100 Dimensions: 60"w x 30"h x 24"d

UNIT MODEL	COVERAGE (FT)	MAX AMPS	V / PH / HZ	HP	USAGE*
HLDA 75	75	10.5	115 / 1 / 60	0.75	5
HLDA 100	100	14.5	115 / 1 / 60	1	6
HLDA 300	300	7.9	560 / 3 / 60	5	18
HLDA 500	500	13	460 / 3 / 60	7.5	30
HLDA 750	750	13.5	460 / 3 / 60	7.5	45
HLDA 1000	1000	22	460 / 3 / 60	15	60
HLDA 1500	1500	33	460 / 3 / 60	20	90

*The maximum effective treatment is 10 PPM of odorous compounds.
Recommended full perimeter coverage.
Average product usage per month, operating 24/7.

► VAPOR PRODUCTS

Evane|Scent

Evane|Scent is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Evane|Scent's individual components are detectable before its interaction with odor compounds, and as a result Evane|Scent is the most aromatic of Hinsilblon's vapor products.

Eco|Scent

Eco|Scent is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Eco|Scent's individual components are detectable before its interaction with odor compounds, and as a result Eco|Scent is Hinsilblon's moderately aromatic vapor product.

Clear|Scent

Clear|Scent is a safe blend of biodegradable essential oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of Clear|Scent's individual components are detectable before its interaction with odor compounds, and as a result Clear|Scent is the least aromatic of Hinsilblon's vapor products.

Orange|Scent is a safe blend of biodegradable citrus oils and trace elements specifically formulated to neutralize odors in solid waste, industrial and municipal facilities. The combined fragrances of the citrus oils results in the most aromatic of Hinsilblon's vapor products.
